IN THE UNITED STATES DISTRICT COURT  
DISTRICT OF UTAH, CENTRAL DIVISION

UNITED STATES OF AMERICA,

Plaintiff,

v.

BRENT LEE CROXFORD

Defendant.

**DEFENDANT'S MOTION TO  
DISMISS INDICTMENT  
FOR LACK OF JURISDICTION**

Case No. 2:02-CR-0302 PGC

The Defendant, Brent Lee Croxford (hereinafter Mr. Croxford), by and through counsel, L. Clark Donaldson, moves this Court to dismiss the Indictment on the following grounds: (1) the operative language of 18 U.S.C. § 2251(a), prohibiting producing visual depictions of conduct involving minors using innocuous "materials" to produce the depictions that have moved in commerce and 18 U.S.C. § 2252A(a)(5)(B), prohibiting the possession of child pornography that was produced using innocuous "materials" that have moved in commerce, exceeds Congress' authority under the Commerce Clause; (2) if the statutes are constitutional on their face, the prosecution of Mr. Croxford nonetheless exceeds Congress' authority; (3) the language of sections 2251(a) and 2252A(a)(5)(B) underlying the indictment in this case deny Mr. Croxford equal protection of the laws; (4) the failure of the statutory schemes to define the term "materials" render the statutes unconstitutionally vague.

## BACKGROUND

Defendant Brent Lee Croxford is charged in Count One with violation of 18 U.S.C. § 2251(a) and Count Two with violation of 18 U.S.C. § 2252A(a)(5)(B).<sup>1</sup> The former statute prohibits the use of a minor to engage in sexually explicit conduct for the purpose of producing a visual depiction of such conduct and the visual depiction must have been produced using “materials” that have been mailed, shipped and transported in interstate and foreign commerce. The latter statute prohibits knowing possession of “any book, magazine, periodical, film, videotape, computer disk, or any other material that contains an image of child pornography . . . that was produced using materials that have been mailed, or shipped or transported in interstate or foreign commerce.” The “material” alleged in Count One is a computer disk and digital computer that were manufactured outside the State of Utah. The “material” alleged in Count Two is a computer hard drive, which was

---

<sup>1</sup> The relevant provisions of the charged statutes are as follows:

§ 2251 Sexual exploitation of children

- (a) Any person who employs, uses, persuades, induces, entices, or coerces any minor to engage in, ... any sexually explicit conduct for the purpose of producing any visual depiction of such conduct, shall be punished as provided under subsection (d), ... if that visual depiction was produced using materials that have been mailed, shipped, or transported in interstate or foreign commerce....

§ 2252A Certain activities relating to material constituting or containing child pornography

- (a) Any person who --

(5) either --

- (A) in the special maritime and territorial jurisdiction of the United States, or on any land or building owned by, leased to, or otherwise used by or under the control of the United States Government, or in the Indian country . . . , knowingly possesses any book, magazine, periodical, film, videotape, computer disk, or any other material that contains an image of child pornography; or
- (B) knowingly possesses any book, magazine, periodical, film, videotape, computer disk, or any other material that contains an image of child pornography that has been mailed, or shipped or transported in interstate or foreign commerce by any means, including by computer, or that was produced using materials that have been mailed, or shipped or transported in interstate or foreign commerce by any means, including by computer,

shall be punished as provided in subsection (b).

1 manufacture outside the State of Utah as well. All items were content-free at the time they arrived in  
 2 Utah, and federal jurisdiction arises solely because these items were “mailed, shipped, or  
 3 transported” into Utah from another location before they were used for illicit activities.

4 The indictment must be dismissed for four reasons. First, the statutes under which Mr.  
 5 Croxford is charged exceed Congress’ authority under the Commerce Clause because it is  
 6 impermissible for Congress to predicate federal jurisdiction on the provenance of innocuous items  
 7 that are subsequently used to engage in criminal conduct. Second, even if the statutes are not facially  
 8 invalid, they are unconstitutional as applied because the jurisdictional element must act as a  
 9 meaningful restriction on federal regulation and there is insufficient proof of an impact on national  
 10 commercial activity in this case. Third, both counts must be dismissed because the application of the  
 11 statutes on these facts would deny Mr. Croxford equal protection of the laws. Finally, because the  
 12 statutes fail to define the term “materials,” they must be struck down as impermissibly vague.

### 13 ARGUMENT

#### 14 **I. Introduction and Historical Background**

15  
 16 The State of Utah has enacted a statute outlawing the sexual exploitation of children through  
 17 the production, distribution, or possession of child pornography.<sup>2</sup>

18 Under Utah’s statute, an offense of sexual exploitation of a minor is punishable as a second  
 19 degree felony for each depiction. *See* Utah Code Ann. § 76-5a-3(3). In this case, for example, Mr.  
 20 Croxford was charged via amended information in Third District Court, State of Utah with thirteen  
 21 counts of Sexual Exploitation of a Minor on June 7, 2002. *See* Third District Court Docket printed  
 22 June 24, 2002, attached hereto as Exhibit A.

23 While the states may criminalize such activity pursuant to their general police power, the  
 24

---

25 <sup>2</sup> *See* Utah Code Ann. § 76-5a-3 (prohibiting knowing production, distribution, possession or  
 26 possession with intent to distribute child pornography; or a minor’s parent or guardian knowingly  
 permitting or consenting to the creation such material).

1 United States does not possess the same broad power to criminalize wholly intrastate criminal  
 2 activity. Rather, the federal government is one of specifically enumerated powers.<sup>3</sup> Congress is  
 3 authorized to define criminal offenses against the United States to the extent that those offenses bear  
 4 some relation to the execution of a power of Congress, or to some matter within the jurisdiction of  
 5 the United States. *See United States v. Fox*, 95 U.S. 670, 672 (1877). For this reason, sexual  
 6 exploitation of children or simple possession of child pornography cannot be federal crimes unless  
 7 the statutes proscribing such conduct rest upon an enumerated power of Congress or otherwise bears  
 8 some relation to a matter within the jurisdiction of the United States.

9 Under the Commerce Clause, Congress is authorized “[t]o regulate Commerce with foreign  
 10 Nations, and among the several States, and with the Indian Tribes.” U.S. Const. Art. I, § 8, cl. 3. This  
 11 power is not limitless, but is instead carefully circumscribed, because an overly broad reading of the  
 12 Commerce Clause would obliterate the system of federalism intended by the Framers of the  
 13 Constitution and underscored by the Tenth Amendment. *See United States v. Lopez*, 514 U.S. 549,  
 14 567 (1995). As the Supreme Court has explained, the Commerce Clause power extends to include:

15 those activities intrastate which so affect interstate commerce, or the exertion of the power of  
 16 Congress over it, as to make regulation of them appropriate means to the attainment of a  
 legitimate end, the effective execution of the granted power to regulate interstate commerce.

17 *Hodel v. Virginia Surface Mining & Reclamation Ass’n*, 452 U.S. 264, 277 (1981) (internal citation  
 18 and quotation marks omitted).

19 As with the jurisdictional elements of 18 U.S.C. §§ 2251(a) and 2252A(a)(5)(B), which  
 20 require a showing that some component of the offending material once moved “in interstate or  
 21 foreign commerce,” Congress frequently relies upon its Commerce Clause power to criminalize  
 22 activities that would otherwise fall outside the jurisdiction of the federal government. *See Note*, the  
 23 Right Results for All the Wrong Reasons: An Historical and Functional Analysis of the Commerce  
 24 Clause, 53 Vand. L. Rev. 271, 283 (2000) (footnote omitted) (noting Congress’ reliance on

---

25 <sup>3</sup> Under the Tenth Amendment, “The powers not delegated to the United States by the  
 26 Constitution, nor prohibited by it to the States, are reserved to the States respectively, or to the  
 people.” U.S. Const. amend. X.

1 Commerce Clause power to expand the number of federal crimes during past two centuries from 17  
2 to more than 3000). In recent years, the Supreme Court has placed important limits on Congress'  
3 efforts to expand its Commerce Clause power beyond the confines that had previously been set. In  
4 three cases, *Lopez*, 514 U.S. at 549, *United States v. Morrison*, 529 U.S. 598 (2000) and *Jones v.*  
5 *United States*, 529 U.S. 848 (2000), the Court sought to re-emphasize the careful distinctions  
6 observed by the Framers with respect to Congress' authority over matters of *national* rather than  
7 *local* concern. In part, the Court suggested that Congress' authority to criminalize a given activity  
8 under the Commerce Clause would stem from the commercial nature of that activity. The Court has  
9 also observed that Congress' inclusion of a jurisdictional element in a statute is not sufficient by  
10 itself to ensure the constitutionality of a statute, because a reviewing court must independently assess  
11 the relationship of the regulated activity to commerce, and must also assess jurisdiction on a case-by-  
12 case basis.

13 Here, in Counts One and Two, the defendant is alleged to have violated 18 U.S.C. §§ 2251(a)  
14 by his possession of a digital computer and computer disk and 2252A(a)(5)(B) by his possession of  
15 a hard drive, both shipped from out-of-state while content-free, and both of which now contain  
16 images of child pornography. These products are of the type commercially available at virtually any  
17 computer store for a virtually limitless variety of personal uses.

18 Mr. Croxford's conduct may be characterized as taking digital images of his then daughter,  
19 C.C. and simple possession of child pornography, which are generally not federal crimes. The  
20 jurisdictional hook bringing Mr. Croxford within the ambit of the federal government is the  
21 statutory requirement that the images of child pornography were "produced using materials that had  
22 been mailed, shipped or transported in interstate or foreign commerce." 18 U.S.C. §§ 2251(a) and  
23 2252A(a)(5)(B). These sections would appear to permit federal regulation of a defendant's activity  
24 in any case where some component of the defendant's criminal conduct had been mailed, shipped, or  
25 transported from out-of-state before the defendant used it.

26 The Sixth Circuit has observed that serious questions exist regarding the constitutionality of

1 such statutory language in § 2252A(a)(5)(B). *See United States v. Corp*, 236 F.3d 325, 332 (6th Cir.  
 2 2001) (“we are faced with serious questions about the constitutionality of the Act under the  
 3 Commerce Clause power of Congress”). The Third Circuit has also questioned the constitutionality  
 4 of the jurisdictional element, noting persuasively:

5       As a practical matter, the limiting jurisdictional factor is almost useless here, since all but the  
 6 most self-sufficient child pornographers will rely on film, cameras, or chemicals that traveled  
 7 in interstate commerce and will therefore fall within the sweep of the statute. At all events, it  
 8 is at least doubtful in this case that the jurisdictional element adequately performs the  
 9 function of guaranteeing that the final product regulated substantially affects interstate  
 10 commerce.

11 *United States v. Rodia*, 194 F.3d 465, 473 (3d Cir. 1999). Echoing the Third Circuit, the Fifth  
 12 Circuit observed in *United States v. Kallestad*, 236 F.3d 225, 229 (5th Cir. 2000), that the  
 13 jurisdictional element “has no principled limit.” While the statute has been upheld in at least one  
 14 circuit as a permissible regulation of items “in commerce,” the courts that have upheld the statute as  
 15 written have done so without analysis. *See United States v. Bausch*, 140 F.3d 739, 741 (8th Cir.  
 16 1998) (upholding statute without discussion after noting jury’s finding that “Bausch took the  
 17 photographs using a Japanese camera that had been transported in interstate or foreign commerce”);  
 18 *see also United States v. Winningham*, 953 F.Supp. 1068 (D. Minn. 1996) (upholding statute as  
 19 category two regulation of things “in” commerce).<sup>4</sup>

20       In other circuits, § 2252A(a)(5)(A) has been upheld against constitutional challenges only  
 21 after the reviewing courts have explicitly refused to assess the statute as written. Instead, those  
 22 courts have ignored the proffered jurisdictional basis and have instead relied upon the purported  
 23 existence of a national market for child pornography to conclude that the statute regulates an activity  
 24 with a “substantial effect” on commerce. *Cf. Kallestad*, 236 F.3d at 229 (noting that the

---

25       <sup>4</sup> Not even the Ninth Circuit has addressed the question of the statute’s constitutionality. In  
 26 the recent case of *United States v. Guagliardo*, 278 F.3d 868 (9th Cir. 2002) the Ninth Circuit  
 instead addressed only the scope of the term “producing,” but did not address any of the issues raised  
 herein because they were not presented by the parties. Without mentioning the constitutional  
 ramifications, the court observed in dicta that the defendant’s conduct fell within the statute because  
 the defendant’s computer disks had been manufactured at an overseas location. *Id.* at 871 n.2.

1 “jurisdictional element is not alone sufficient to render section 2252(a)(4)(B) constitutional” and  
2 upholding statute under “market theory”); *United States v. Angle*, 234 F.3d 326, 337 (7th Cir. 2000)  
3 (noting “doubts” regarding constitutionality of the jurisdictional element, but declining to consider  
4 the jurisdictional language of statute and concluding instead that “the statute passes constitutional  
5 muster as a category three regulation via a market theory”); *Rodia*, 194 F.3d at 473-79 (ignoring  
6 jurisdictional basis selected by Congress and instead upholding statute under market theory); *United*  
7 *States v. Robinson*, 137 F.3d 652, 656 (1st Cir. 1998) (citing jurisdictional element but concluding  
8 that statute is constitutional because it regulates activities substantially affecting commerce). These  
9 courts have reached this conclusion even though the statute itself contains no language pertaining to  
10 a “substantial effects” theory of jurisdiction.

11 This innovative and unsupported approach to statutory interpretation is constitutionally  
12 impermissible. In fact, as the plain language of both statutes require, this Court must instead  
13 determine whether jurisdiction is valid in light of the limited jurisdictional basis selected by  
14 Congress -- the prior movement of content-free items “in commerce.” The existence of any  
15 “interstate market” is irrelevant to this inquiry because Congress did not incorporate an “affecting  
16 commerce” basis into the jurisdictional element. When properly analyzed, the statutes must be  
17 found to exceed Congress’ authority under the Commerce Clause.

## 18 **II. The Legislative History of 18 U.S.C. § 2252A(a)(5)(B)**

19 In assessing the constitutionality of the instant prosecution, the legislative history of 18  
20 U.S.C. § 2252A(a)(5)(B) merits discussion. In 1978, 18 U.S.C. § 2252 was passed by Congress to  
21 enable federal prosecutors to combat child pornography. The provision at that time outlawed the  
22 transportation for sale and/or the receipt for sale of any child pornography which had traveled in  
23 interstate commerce. The legislative history of the provision indicates that Congress sought to target  
24 large-scale producers and distributors of child pornography and to curtail what was understood to be  
25 a profitable nationwide industry, as evidenced by the following concerns:  
26

- 1       - That child pornography and child prostitution have become highly organized, multimillion dollar industries that operate on a nationwide scale.
- 2       - That the use of children as prostitutes or as subjects of pornographic materials is very harmful to both the children and society as a whole.
- 3       - That such prostitution and the sale and distribution of such pornographic materials are carried on to a substantial extent through the mails and other
- 4       instrumentalities of interstate and foreign commerce, and
- 5       - That existing Federal laws dealing with prostitution and pornography do not protect against the use of children in these activities and that specific
- 6       legislation in this area is both advisable and needed.

1978 U.S. Code Cong. and Admin. News at 42-43.

In addition, Congress noted that:

In addressing this issue, the Committee is well aware of the delicate balance that must be maintained between federal and state and local law enforcement efforts to curb criminal behavior. It is quite true that the general responsibility for dealing with criminal activity is normally not a matter of Federal concern. At the same time, however, the Committee is convinced that the use of children in the production of pornographic materials is a matter that cannot be adequately controlled by state and local authorities. What is needed is a coordinated effort by Federal, state and local law enforcement officials aimed at eradicating this form of child abuse.

*Id.* at 48.

Nonetheless, Congress decided when it passed the precursor to § 2252 that it would pay deference to the “delicate balance” between federal and state law enforcement, setting forth the following expression of intent:

It is the Committee’s intention that the government will have the affirmative burden of showing that the person charged knew or should have known that the materials described under 2251(a) and (b) will be transported in interstate or foreign commerce or mailed. While the Committee recognizes that the jurisdictional element is often a difficult one to prove, it nonetheless believes that this requirement is necessary to preserve the balance between the law enforcement responsibilities of Federal officers on one hand, and their state and local counterparts, on the other.

*Id.* at 53.<sup>5</sup>

18 U.S.C. § 2252 was amended over the years to expand its coverage. In 1984, for example, the statute was enlarged to cover individuals who reproduce child pornography for distribution in interstate or foreign commerce. The legislative history of what later became 18 U.S.C. § 2252(a)(2) noted that:

Paragraph (6) creates a new offense of knowingly reproducing any visual depiction for distribution in interstate or foreign commerce or through the mails. This offense closes a

---

<sup>5</sup> § 2251 (a) and (b) were later codified as 18 U.S.C. § 2252.

1        loophole which has required proof that the producers of child pornography actually use the  
2        child depicted in the production of the material. This new offense will make prosecution of  
3        those who make or produce child pornography easier by applying the offense to those who  
4        merely reproduce such materials for distribution.

5        As with the original statute, the focus of this revision remained upon the industry-wide use of the  
6        mails by distributors of child pornography. Until 1990 then, 18 U.S.C. § 2252 did not apply to  
7        simple possession of child pornography, but rather only to individuals who knowingly transported,  
8        shipped, or mailed child pornography in interstate or foreign commerce, or who knowingly received  
9        such material which had been shipped, transported or mailed in interstate or foreign commerce.

10        In 1990, Congress expanded § 2252 in an unprecedented fashion by adding a sentence to §  
11        2252(a)(2) making it illegal to receive a tape which “contains material” which has been transported  
12        in interstate commerce. Congress further added to § 2252 the new subsection (a)(4)(B), which  
13        prohibited the simple possession of child pornography that had been mailed, shipped or transported  
14        in interstate commerce, or that was produced using materials that had been mailed, shipped or  
15        transported in interstate commerce. Subsequently, in 1996, Congress enacted section 2252A as part  
16        of the Child Pornography Prevention Act. While the two statutes now prohibit essentially the same  
17        activities, section 2252A differs from section 2252 in that the crime of simple possession is  
18        contained in subsection (5) of 2252A rather than subsection (4), as in section 2252. Substantively,  
19        section 2252A differs from section 2252 in that the former statute now uses the statutorily defined  
20        term, “child pornography,” a term that was also added as part of the 1996 Act. *See Shannon, The*  
21        *Jurisdictional Limits of Federal Criminal Child Pornography Law*, 21 U. Haw. L. Rev. 73, 82-83  
22        (1999).

23        Unfortunately, there appears to be absolutely no legislative history produced by Congress as  
24        to why it saw fit to expand the scope of § 2252 in such a fashion. *See* 1990 U.S. Code and Admin.  
25        News 6472 *et seq.* Nor did Congress make any findings suggesting that simple possession of child  
26        pornography would bear any connection to the purported nationwide market referenced in the 1978  
27        legislative history. Thus, the intent of Congress with respect to the need for these provisions is

1 unknown.

2 In fact, commentators have observed that almost no current commercial market exists in the  
3 United States for child pornography. See John Quigley, Child Pornography and the Right to Privacy,  
4 43 Fla. L. Rev. 347, 359-60 & nn. 118-19 (1991) ("Commercial production and distribution of child  
5 pornography existed in the United States in the 1970s, but virtually ceased after 1980."). Several  
6 decades ago, at the time that the federal government first passed anti-child pornography legislation in  
7 this area, child pornography represented a small portion of the pornography industry in the United  
8 States. See *id.* at 369 n.118 (quoting Illinois Legislative Investigating Comm'n, Sexual Exploitation  
9 of Children: A Report to the Ill. Gen. Assembly 30 (1980)) ("Pornography and other sex-related  
10 'industries' continue to be enormous operations in this country. However, neither child pornography  
11 nor child prostitution has ever represented a significant portion of the industry."). Whatever the  
12 market may have been twenty-five years ago, empirical evidence indicates that this market has now  
13 almost entirely collapsed. See *id.* at 359 n.119 (quoting 1 U.S. Dep't of Justice, Attorney General's  
14 Commission on Pornography: Final Report 648 (1986)) ("When the Supreme Court in 1982  
15 approved of child pornography laws . . . enforcement efforts accelerated, and the sum total of these  
16 enforcement efforts has been to curtail substantially the domestic commercial production of child  
17 pornography."); *id.* (quoting American Civil Liberties Union, Polluting the Censorship Debate: A  
18 Summary and Critique of the Final Report of the Attorney General's Commission on Pornography  
19 104 (1986) ("[T]here is virtually no commercial marketing of child pornography in the United  
20 States.")). Modern-day child pornographers rely on an underground network of trading materials on  
21 a non-commercial basis, further drying up the commercial market. See *Rodia*, 194 F.3d at 480  
22 (citing H.R.Rep. No. 99-910, at 4, and H.R.Rep. No. 98-536, at 11). Earlier Congressional findings  
23 from 1978 regarding the existence of this industry are thus of limited value in determining the extent  
24 of the market today.

25 **III. The Statutes Must be Struck Down As Facially Unconstitutional**  
26

1           **A.     *Lopez, Morrison, and Jones* Require That the Jurisdictional Element Serve as a**  
 2                   **Meaningful Restriction on Congress' Regulatory Power**

3  
 4           As enumerated by the Supreme Court, the Commerce Clause of the Constitution empowers  
 5 Congress to regulate three categories of activity: (1) "the use of the channels of interstate  
 6 commerce"; (2) "the instrumentalities of interstate commerce, or persons or things in interstate  
 7 commerce, even though the threat may come only from intrastate activities"; and (3) "activities  
 8 having a substantial relation to interstate commerce." *Lopez*, 514 U.S. at 558-59. In light of the  
 9 jurisdictional language of sections 2251(a) and 2252A(a)(5)(B), targeting movement of the materials  
 10 "in interstate or foreign commerce," the breadth of the second category is implicated in this  
 11 jurisdictional challenge.

12           In the last decade the Supreme Court has signaled a growing discomfort with the expansion  
 13 of federal criminal statutes through Congress' reliance on its Commerce Clause power, into the  
 14 province of what has traditionally been state police power. This trend has culminated in the last term  
 15 with two additional pronouncements by the Supreme Court in this area: *Morrison*, 529 U.S. at 598,  
 16 and *Jones*, 529 U.S. at 848. An understanding of the guiding principles set forth in these cases is  
 17 necessary to an analysis of the constitutionality of sections 2251(a) and 2252A. Indeed, should this  
 18 matter proceed to the Supreme Court, it may be that *United States v. Croxford* will result in the  
 19 fourth and most definitive statement yet of the limitations on Congress' Commerce Clause power.

20           In *Lopez, Morrison, and Jones*, the Supreme Court has re-established the basic constitutional  
 21 proposition that the Founders did **not** cede to Congress a general police power. Instead, to justify a  
 22 Congressional attempt to regulate intrastate criminal activity, the activity to be regulated must fall  
 23 under one of three categories. The starting point for this analysis is the jurisdictional language  
 24 selected by Congress -- in other words, has Congress sought to regulate the use of the "channels" of  
 25 commerce, the movement of materials "in commerce," or specified activities "substantially  
 26 affecting" commerce? According to *Jones*, if the language of the jurisdictional element uses the term

1 “affecting commerce,” then Congress is deemed to have signaled its intention to invoke its full  
2 authority under the Commerce Clause. *See Jones*, 529 U.S. at 854. In contrast, if the statute uses the  
3 term “in commerce,” then Congress is invoking a more restricted basis for its Commerce Clause  
4 authority.

5 Where Congress signals its intention to rely upon its full authority to regulate activities  
6 “affecting commerce,” *Lopez* teaches that the proper test for interstate nexus under that category is  
7 that the activity “‘substantially affects’ interstate commerce.” *Lopez*, 514 U.S. at 559.<sup>6</sup> To  
8 determine whether there is a substantial effect, several considerations are pertinent to the analysis.  
9 First, the reviewing court should inquire whether the activity itself is economic in the sense of being  
10 part of a larger economic regulatory scheme. *Lopez*, *Jones*, and *Morrison* teach that intrastate  
11 criminal activity is not economic in this sense.

12 Where the local activities are not economic and are not being regulated as part of a national  
13 economic scheme, Congress would lack the power to regulate those local activities. *See Lopez*, 514  
14 U.S. at 558 (activities with de minimis impact on commerce may be regulated pursuant to “a general  
15 regulatory statute [that] bears a substantial relation to commerce”); *id.* at 567 (de minimis standard  
16 not appropriate where regulated activity “is in no sense an economic activity that might, through  
17 repetition elsewhere, substantially affect . . . interstate commerce”); *Morrison*, 529 U.S. at 611  
18 (“*Lopez*’s review of Commerce Clause case law demonstrates that in those cases where we have  
19 sustained federal regulation of intrastate activity based upon the activity’s substantial effects on  
20 interstate commerce, the activity in question has been some sort of economic endeavor.”).

21 Second, the reviewing court should look to whether the statute has a jurisdictional element

---

22  
23 <sup>6</sup> *Lopez* and *Morrison* are primarily concerned with the limits of Congress’ power under  
24 “category three,” through which Congress may regulate a “class of activities” that “affect  
25 commerce,” even though the local activities have only a de minimis effect on commerce. Because  
26 sections 2251(a) and 2252A are “category two” statutes predicated on Congress’ narrow power to  
regulate the movement of things “in commerce,” those cases are not directly relevant here.  
Nonetheless, *Lopez* and *Morrison* raise issues regarding statutory analysis that are relevant here,  
particularly because some circuits have erroneously relied upon *Lopez* and *Morrison* to uphold the  
statutes.

1 that requires a particularized showing of interstate nexus. When a jurisdictional element appears in a  
2 statute, that element “would lend support” to the argument that the statute is sufficiently tied to  
3 interstate commerce. *Morrison*, 529 U.S. at 613. However, “[w]hether particular operations affect  
4 interstate commerce sufficiently to come under the constitutional power of Congress to regulate them  
5 is ultimately a judicial rather than a legislative question, and can be settled finally only by [the  
6 Supreme] Court.” *Id.* at 614 (quoting *Lopez*, 514 U.S. at 557 n.2).

7 Third, a court may look to legislative findings as support for a sufficient interstate nexus. But  
8 if Congress’ method of reasoning in making such findings would permit the untenable conclusion  
9 that every activity would be within reach of national regulation, then such findings must be rejected.  
10 Notably, the Supreme Court applied this principle in *Morrison*, in which the Court considered a  
11 federal statute that was supported by “numerous findings” regarding the effect of gender-motivated  
12 violence on commerce. *See id.* The *Morrison* Court, however, deemed the Congressional findings  
13 insufficient to establish interstate nexus. *Id.* at 615-17. The Court further noted that the same faulty  
14 reasoning employed in that statute would lead to permitting Congress to regulate such traditional  
15 areas of state regulation as family law. *See id.* at 615-16; *id.* at 617 (“We accordingly reject the  
16 argument that Congress may regulate noneconomic, violent criminal conduct based solely on that  
17 conduct’s aggregate effect on interstate commerce.”).

18 The Supreme Court has rejected reasoning about aggregate effects of non-economic activities  
19 because such reasoning leads to unacceptable results. As the Court observed in *Lopez*, if the nexus  
20 to commerce could be demonstrated through the aggregation of purely local non-economic activities,  
21 the Court would be “hard pressed to posit any activity by an individual that Congress is without  
22 power to regulate.” *Lopez*, 514 U.S. at 565; *see also id.* at 602 (Thomas, J., concurring) (“If we wish  
23 to be true to a Constitution that does not cede a police power to the Federal Government, our  
24 Commerce Clause’s boundaries simply cannot be defined as being commensurate with the national  
25 needs . . . . Such a formulation of federal power is not a test at all: It is a blank check.”) (citations  
26 omitted). In the same vein, in Justice Stevens’ concurrence in *Jones*, he spoke of his discomfort with

1 a statute that effectively displaces a state statute. *See Jones*, 529 U.S. at 859 (Stevens, J.,  
 2 concurring). He stated his reluctance

3 to believe Congress intended to authorize federal intervention in local law enforcement in a  
 4 marginal case such as this. The fact that petitioner received a sentence of 35 years in  
 5 prison when the maximum penalty for the comparable state offense was only 10 years,  
 illustrates how a criminal law like this may effectively displace a policy choice made by the  
 State.

6 *Id.* (internal citations and quotation marks omitted).

7  
 8 **B. The Statutes are Facially Invalid Because the Jurisdictional Element Has**  
 9 **No Meaningful Connection to the Targeted Conduct and Because the**  
 10 **Jurisdictional Elements Would Cede to Congress a General Police Power**

11 Sections 2251(a) and 2252A(a)(5)(B) invoke Congress' power under *Lopez*'s category two:  
 12 regulation of things moving "in commerce." As relevant here, the statutes permits federal  
 13 prosecution on a showing that the "materials" subsequently used to produce the pornography were  
 14 previously "mailed, or shipped or transported in interstate or foreign commerce." The statute  
 15 contains no jurisdictional language invoking category three of Congress' power, which would permit  
 16 prosecution by virtue of a showing that the defendant's conduct "substantially affected" commerce.<sup>7</sup>

17 These statutes, which grant federal jurisdiction by virtue of the prior movement of any  
 18 "materials" later used to produce pornography, is unconstitutional on its face because it can never be  
 19 applied in a constitutionally adequate manner. Three characteristics of the jurisdictional element  
 20 demonstrate its unconstitutionality. First, the statute impermissibly regulates pursuant to a  
 21 jurisdictional theory that has no stopping-point, in that the statutes predicate jurisdiction on the out-  
 22

---

23  
 24 <sup>7</sup> By comparison, this jurisdictional element is in contrast with the jurisdictional language of  
 25 another well-known possession statute, 18 U.S.C. § 922(g), prohibiting possession of a firearm by a  
 26 felon where that possession is "in or affecting commerce," and is also in contrast with the  
 jurisdictional element of 18 U.S.C. § 844(i), which makes it a federal crime to "maliciously  
 damage[] or destroy[] . . . any building . . . used in interstate or foreign commerce or in any activity  
 affecting interstate or foreign commerce."

1 of-state origin of common consumer goods that are later used for criminal purposes. Second, the  
2 jurisdictional element is not meaningfully related to the targeted conduct, with the result that the  
3 statute itself contains no limiting condition on the activities to which it may be applied. Thus, the  
4 task of drafting and applying a meaningful jurisdictional element is impermissibly left to the courts.  
5 Third, unlike other statutes regulating the movement of things in commerce, the jurisdictional  
6 elements here are not aimed at the movement of any illegal "thing in commerce," but are instead  
7 aimed at the subsequent production or possession of an illegal thing based on the historical fact that  
8 some component of the item was once in commerce. This logical absurdity is only highlighted by  
9 the fact that, at trial, the government will be required to prove a *recent* movement in commerce, even  
10 though the regulated item is not alleged to have moved in commerce at any time.

11 At the outset, the statutes must fail because they are predicated on a jurisdictional theory that  
12 would impermissibly permit Congress to regulate all local criminal activities. As the language of the  
13 statutes demonstrates, jurisdiction is premised on the out-of-state origin of "materials" later used to  
14 commit criminal activities. In our modern society, however, virtually all consumer goods contain at  
15 least some component which originated outside the state in which the defendant later possesses  
16 them. Indeed, as Justice Kennedy noted on a related point in his concurrence in *Lopez*, "[i]n a sense  
17 any conduct in this interdependent world of ours has an ultimate commercial origin or consequence,  
18 but we have not yet said the commerce power may reach so far." *Lopez*, 514 U.S. at 580 (Kennedy,  
19 J., concurring). The reach of this jurisdictional theory is limitless, such that the Court would be  
20 "hard pressed to posit any activity by an individual that Congress is without power to regulate." *Id.* at  
21 565. Here, for example, Mr. Croxford finds himself in federal court only for the most trivial reason:  
22 he used a digital camera, computer disk and hard drive made outside Utah. This sort of prosecution  
23 must fail because the acquisition and possession of the content-free materials subsequently used to  
24 produce the pornography are not unlawful acts and thus fall outside Congress' regulatory power. A  
25 defendant's subsequent use of the materials for illicit purposes cannot suddenly give rise to federal  
26 jurisdiction, because such logic would also permit Congress to regulate any conduct with respect to

1 any consumer good transported from another state.<sup>8</sup>

2 Second, the out-of-state origin of any "materials" that may be used for innocent activities  
3 cannot provide a basis for regulation of possession of child pornography because there is no  
4 consequential relationship between the interstate movement of the materials and the later use for  
5 pornographic purposes. The jurisdictional element thus fails to act as a meaningful restriction on  
6 Congress' regulatory power. Indeed, even the most trivial variation in the facts would destroy the  
7 basis for federal jurisdiction: if the pornography in this case had been produced using materials that  
8 originated in Utah, Mr. Croxford would not be subject to federal prosecution. Moreover, there is no  
9 requirement that Mr. Croxford himself had purchased the camera, disk or hard drive, such that he  
10 could be prosecuted in federal court for creating a visual depiction of child pornography or simple  
11 possession of child pornography even where the disk and hard drive had been purchased by someone  
12 else.

13 Federal prosecution is thus predicated on a level of triviality and attenuation that is almost  
14 Kafka-esque in its absurdity. Indeed, as the Sixth Circuit noted in *Corp*, "A painter using a model  
15 who was just under 18, even if it was his wife, would fall afoul of the statute if the paints, brushes, or  
16 canvas had traveled in interstate commerce, even long before the enactment of the act." *Corp*, 236

17  
18 <sup>8</sup> Compare, for example, the findings underlying the Popcorn Promotion, Research, and  
19 Consumer Information Act, which is part of the Federal Agriculture Improvement and Reform Act of  
20 1996:

20 Congress finds that--

21 (1) popcorn is an important food that is a valuable part of the human diet;  
22 (2) the production and processing of popcorn plays a significant role in the economy of the  
23 United States . . .

24 (3) popcorn must be of high quality, readily available, handled properly, and marketed  
25 efficiently to ensure that the benefits of popcorn are available to the people of the United  
26 States . . .

24 (6) popcorn moves in interstate and foreign commerce, and popcorn that does not move in  
25 those channels of commerce directly burdens or affects interstate commerce in popcorn.  
26 Pub.L. 104-127, 110 Stat. 888, 1074 (1996). (con't)

On these findings, could Congress criminalize all popcorn-related activities? The answer  
must be no. Such a hyperextension of Congress' power to regulate would certainly cede to Congress  
a general police power.

1 F.3d at 331.

2 Commentators have evaluated precisely this issue in the context of the new Gun Free School  
3 Zone Act enacted after the Supreme Court struck down the earlier version challenged in *Lopez*. See  
4 Litman & Greenberg, Federal Power and Federalism: A Theory of Commerce-Clause Based  
5 Regulation of Traditionally State Crimes, 47 Case W. Res. L. Rev. 921 (Spring 1997) (hereinafter  
6 "Litman and Greenberg")

7 Writing prior to the enactment of the new act, Litman and Greenberg assessed whether the  
8 inclusion of a jurisdictional element requiring movement of the firearm "in commerce" would render  
9 the statute constitutional. Litman and Greenberg argue that jurisdiction predicated on  
10 movement "in commerce" should not pass constitutional muster unless the movement of the item  
11 across state lines is a dominant cause of the harm Congress seeks to regulate. Thus, the authors  
12 argue, the interstate movement of a gun subsequently possessed near a school would be a dominant  
13 cause of the regulated activity, while the fact that the gun was covered with paint that had traveled  
14 interstate would not be a dominant cause. Applying this test here, the issue presented is whether  
15 sections 2251(a) and 2252A(a)(5)(B) regulate an action that has a direct causal relationship to the  
16 harm of child pornography, or whether it regulates incidental activity.

17 Clearly, the statute regulates incidental activity because the movement of content-free  
18 consumer products from an out-of-state location is not the cause of the creation or possession of  
19 child pornography. It may well be that a defendant could not possess child pornography without  
20 such material, any more than he could make child pornography without breathing air, which  
21 assuredly has traveled across state lines. However, the jurisdictional basis exceeds Congress'  
22 authority where the basis for federal regulation is not the movement of pornography itself but the  
23 movement of innocent, non-harmful, content-free things that are later used to produce the  
24 pornography. Here, for example, Mr. Croxford is being prosecuted for his possession of consumer  
25 products that once crossed a state line and that were later used to record depictions or store  
26 pornography, after which federal jurisdiction arose. The complexity of this inferential chain itself

1 points up the absurdity of the prosecution.

2 In the absence of a consequential relationship between the jurisdictional element and the  
3 regulated conduct, federal jurisdiction should not arise unless the regulated item had moved in  
4 commerce. By comparison, even in the context of 18 U.S.C. § 922(g) -- which already involves a  
5 hyperextension of Congressional power -- federal jurisdiction arises because the firearm possessed  
6 by the felon had crossed a state line.

7 Finally, related case law in the Ninth Circuit underscores the fatal flaw in this statute. Should  
8 Mr. Croxford's challenge fail and this matter proceed to trial, the government will be obligated to  
9 demonstrate that the item has *recently* moved in commerce, because an item or article cannot be  
10 deemed *forever* "in interstate commerce" based on one past movement across state lines. *See United*  
11 *States v. Nukida*, 8 F.3d 665, 671 (1993). Indeed, in several cases, the Ninth Circuit has held that  
12 determination of the interstate nature of stolen articles is a question of fact for the trier of fact. *See*  
13 *id.* (citing *inter alia United States v. Jones*, 564 F.2d 1315 (9th Cir. 1977) and *United States v.*  
14 *Cyphers*, 604 F.2d 635 (9th Cir. 1979)). This requirement provides a further angle from which to  
15 view the hyperextension of Congress' authority in sections 2251(a) and 2252A, because the  
16 government would be unable to prove that the regulated item itself had moved in commerce.  
17 Instead, the government would seek to establish that the camera, disk and hard drive had recently  
18 moved in commerce before the defendant used them, even though it is not the purchase or possession  
19 of these items which is illegal. Rather, it is recording the depictions of child pornography and  
20 possession of the child pornography contained on them.

21 Any link to commerce under sections 2251(a) and 2252A are too attenuated to support such a  
22 serious prosecution as the one in this case. If such a link is sufficient, then there is scarcely any item  
23 or activity that is not subject to regulation by Congress. For example, Congress could regulate  
24 physical assaults involving weapons by outlawing the use of weapons that moved in commerce.  
25 Moreover, virtually any murder involving a gun would fall within federal jurisdiction because the  
26 majority of firearms and bullets have crossed state lines at some point in their history. *See, e.g.,*

1 *Kallestad*, 236 F.3d at 229 (“It is one thing for Congress to prohibit possession of a weapon that has  
2 itself moved in interstate commerce, but it is quite another thing for Congress to prohibit homicides  
3 using such weapons.”).

4 There is absolutely no difference between this sort of impermissible logic and the logic  
5 underlying these prosecutions under sections 2251(a) and 2252A. Because such reasoning  
6 obliterates the national/local allocation of powers intended by the Constitution, sections 2251(a) and  
7 2252A(a)(5)(B) must be struck down

8 .  
9 **C. The Court Cannot Insert a “Substantial Effects” Jurisdictional Element Into**  
10 **the Statutes Because that Element was Not Included by Congress, and Because**  
11 **There are No Current Findings to Support a Market Rationale**

12 Finally, as an alternative jurisdictional basis, the government may attempt to argue that the  
13 statute is permissible as a category three regulation of de minimis local activities with a “substantial  
14 effect” on commerce in the aggregate. Several circuits, ignoring the clear language of the statute,  
15 have upheld section 2252(a)(4)(B) under this category. *See Kallestad*, 236 F.3d at 229; *Angle*, 234  
16 F.3d at 337; *Rodia*, 194 F.3d at 473-79; *Robinson*, 137 F.3d at 656. Notably, the Fifth Circuit  
17 reached this conclusion in *Kallestad* over a strong dissent by Judge E. Grady Jolly in which he  
18 argued that, under *Lopez* and *Morrison*, simple possession of child pornography is a non-economic  
19 activity that Congress lacks the power to regulate. *See Kallestad*, 236 F.3d at 233 (Jolly, J.,  
20 dissenting).

21 None of those authorities may be relied upon here. The courts that have taken this alternative  
22 approach have done so in recognition of the fatal flaw in Congress’ logic, and have thus explicitly  
23 upheld the statute on grounds not provided by Congress. *See, e.g., Rodia*, 194 F.3d at 473-79 (noting  
24 serious flaws in jurisdictional basis selected by Congress, and instead upholding statute under market  
25 theory); *Angle*, 234 F.3d at 337 (same); *Kallestad*, 236 F.3d at 229-30 (same ). However,  
26

1 particularly after *Lopez*, this Court must assess the statute as written, and may not endeavor to  
2 substitute a “winning rationale” for Congress.<sup>9</sup> Moreover, any attempt to rely on a “substantial  
3 effects” theory also fails on the merits in light of the absence of appropriate and current legislative  
4 findings to support this basis for jurisdiction.

5 First, as noted above, the language of the statutes preclude this interpretation. As the  
6 Supreme Court has noted in the context of other federal statutes using only “in commerce” language,  
7 Congress recognizes the distinction between the jurisdictional terms “in commerce” and “affecting  
8 commerce,” and recognizes as well that the “in commerce” language provides a more limited basis  
9 for its jurisdiction. See *United States v. American Building Maintenance Industries*, 422 U.S. 271,  
10 279-81 (1975). Where Congress selects the jurisdictional language “in commerce,” Congress is  
11 understood to intend to regulate only the flow of items in commerce, and not the substantial effects  
12 of the activity upon commerce. See *id.* Here, in light of Congress’ choice of language pertaining to  
13 *mailing, shipping, or transporting in interstate or foreign commerce*, the instant prosecution can  
14 therefore only proceed on a showing that some component of the regulated item moved in the flow  
15 of commerce. See *Gulf Oil Corp. v. Copp Paving Co.*, 419 U.S. 186, 195 (1974) (noting that “in  
16 commerce” refers to “practical, economic continuity in the generation of goods and services for  
17 interstate markets and their transport and distribution to the consumer”); *FTC v. Bunte Bros.*, 312  
18 U.S. 349, 354-55 (1941) (declining to extend reach of unfair competition act to include activities  
19 substantially affecting commerce without “a clearer mandate from Congress” because statute referred  
20 only to unfair competition “in commerce” and a broader reading of the statute would constitute a  
21 “far-reaching” “inroad upon local conditions and local standards”).

22 The legislative history supports this conclusion because Congress repeatedly referred to the  
23

---

24 <sup>9</sup> As commentators have noted with regard to the rationale of *Lopez*, “the *Lopez* Court’s  
25 unwillingness to supply a winning rationale [for 18 U.S.C. §922(q)] was what distinguished it from  
26 earlier Commerce Clause decisions.” Reynolds & Denning, *Lower Court Readings of Lopez*, or  
What if the Supreme Court Held a Constitutional Revolution and Nobody Came?, 2000 Wis. L. Rev.  
369, 402 n. 100 (2000).

1 use of the mails by child pornographers as the basis for jurisdiction. *See, e.g.*, 1978 U.S. Code Cong.  
2 and Admin. News at 42-43 (“such prostitution and the sale and distribution of such pornographic  
3 materials are carried on to a substantial extent through the mails and other instrumentalities of  
4 interstate and foreign commerce”). Thus, in light of Congress’ selection of a more specific  
5 jurisdictional element, the reasoning of *Kallestad*, *Robinson*, *Rodia*, and *Angle* must be rejected  
6 because Congress’ choice of words is dispositive on this issue and the courts may not give a broader  
7 reach to the statute without clearer direction from Congress. *See Bunte Bros.*, 312 U.S. at 354-55.

8         The error in this logic is also demonstrated by the fact that a market theory approach would  
9 impermissibly invert the jurisdictional element. The Third Circuit’s analysis in *Rodia* highlights the  
10 error. There, the court concluded that the possession of “home grown” child pornography  
11 substantially affected commerce because such possession would stimulate the pornographer’s  
12 appetite for pornography, leading him to “look to the interstate market as a source of new material,  
13 whether through mail order catalogs or through the Internet.” *See Rodia*, 194 F.3d at 477. Other  
14 courts have followed this method of analysis. *See, e.g., Angle*, 234 F.3d at 337-38 (adopting *Rodia*’s  
15 analysis).

16         In fact, in contrast to the *Rodia* court’s *prospective* analysis of jurisdiction, the language of  
17 the statute instead requires a *retrospective* determination that the materials had previously moved in  
18 commerce, as discussed above. Congress did not provide that jurisdiction could be proved through  
19 conjecture regarding a *future* demand for child pornography, because the statute contains no  
20 language permitting a prospective analysis under a market theory. Rather, the statute requires proof  
21 of mailing, shipping, or transporting across state lines. In light of this limited focus, the government  
22 must demonstrate that jurisdiction is permissible based solely on a showing that the production  
23 materials previously moved “in commerce.”

24         Finally, the third *Lopez* category is also inapplicable because there are no current legislative  
25 findings to support two crucial predicates for category-three legislation: (1) Congress must find that  
26 the local activity is commercial in nature; and (2) Congress must find that local activities may be

1 regulated in light of the national economic impact of the activity. Regarding the first requirement,  
 2 *Lopez* and *Morrison* mandate that the regulated activity must itself be commercial in nature because  
 3 non-economic activities may not be aggregated to demonstrate a substantial effect on commerce. *See*  
 4 *Reynolds & Denning*, Lower Court Readings of *Lopez*, or What if the Supreme Court Held a  
 5 Constitutional Revolution and Nobody Came?, 2000 Wis. L. Rev. 369, 381 (2000) ("Effects upon  
 6 interstate commerce may be 'aggregated' in *Wickard* fashion only where the activity in question is  
 7 economic -- that is, commercial."); *Corp*, 236 F.3d at 329, 333 (noting that court considering  
 8 Commerce Clause challenge must consider four factors, including whether "the prohibited activity  
 9 [is] commercial or economic in nature," but declining to determine whether defendant's conduct was  
 10 commercial in light of reversal on other grounds).

11 There are no express legislative findings to support the conclusion that local recording of  
 12 explicit visual depictions of minors or possession of child pornography are commercial activities  
 13 with an effect on national commerce. *See Rodia*, 194 F.3d at 480 ("We are troubled by the lack of  
 14 express Congressional findings about the effect of intrastate possession of child pornography on  
 15 interstate commerce."); *Kallestad*, 236 F.3d at 233 (Jolly, J., dissenting) (noting that "no  
 16 congressional findings support the necessity of such regulation in the framework of a broader  
 17 regulatory scheme"). Thus, the Third Circuit in *Rodia* did not conclude that local pornographic  
 18 activities are themselves commercial, but instead relied on *Wickard v. Filburn*, 317 U.S. 111 (1942)  
 19 to conclude that "homegrown" pornography substantially affects commerce because it bears a  
 20 connection to the purported nationwide industry and has an "obvious commercial element." *See*  
 21 *Rodia*, 194 F.3d at 480-82; *see also Angle*, 234 F.3d at 337-38 (same); *Kallestad*, 236 F.3d at 228  
 22 (same). This reliance on a *Wickard* theory of aggregation<sup>10</sup> was rejected by Judge Jolly in his well-

---

23  
 24 <sup>10</sup> In *Wickard v. Filburn*, 317 U.S. 111, 125 (1942), the Supreme Court upheld a federal  
 25 statute permitting the imposition of a marketing penalty on wheat grown for home consumption. The  
 26 Court held that a farmer could permissibly be required to pay a tax on wheat grown for home  
 consumption where that wheat exceeded the farmer's allotment for the year, because the farmer's  
 activities interfered with a national economic scheme to regulate the price of wheat. *See id.* at 128  
 ("It is well established by decisions of this Court that the power to regulate commerce includes the

1 reasoned dissent in *Kallestad*, in which he concluded, “Kallestad’s non-commercial, local possession  
2 of child pornography, where no interstate transportation or commercial transaction occurred, had at  
3 most an insubstantial affect on the interstate market for child pornography.” *Kallestad*, 236 F.3d at  
4 233 (Jolly, J., dissenting).

5 The so-called aggregation principle of *Wickard* must be carefully applied, lest *Wickard*  
6 swallow the careful federalist principles established in the Constitution and underscored by *Lopez*  
7 and *Morrison*. Here, *Wickard* should be found inapplicable for three reasons: first, the statute does  
8 not invoke Congress’ category-three power, which is the only jurisdictional theory on which *Wickard*  
9 is predicated; second, there is no indication that local possession is an economic activity; and third,  
10 there are no current findings to support the conclusion that a national market exists. *See, e.g.,*  
11 *Kallestad*, 236 F.3d at 232 (Jolly, J., dissenting) (footnote omitted) (“[T]he persuasiveness of  
12 *Wickard* in the wake of *Lopez* and *Morrison* is questionable in the analysis of the criminal statute we  
13 consider today. Moreover, the facts before this court are distinguishable from those in *Wickard*.”).

14 Regarding the second requirement of national economic consequences, proof of such  
15 consequences is necessary because Congress gains its authority to regulate activities only by virtue of  
16 their aggregate economic effect. *Morrison*, 529 U.S. at 613. However, as noted earlier,  
17 commentators have concluded that the commercial market for child pornography has substantially  
18 abated since the 1970s. *See discussion supra* at pgs. 8-9. There are no current legislative findings on  
19 this issue.

20 Each of the courts that has relied upon a “market” theory to support section 2252A has found  
21 the existence of a market on the basis of outdated Congressional findings from the mid-1980s and  
22 the 1970s, such as Congress’ finding in 1977 “that child pornography is a multimillion dollar,  
23 nationwide industry.” *See Rodia*, 194 F.3d at 480; *Kallestad*, 236 F.3d at 229 (citing Congressional  
24

---

25 power to regulate the prices at which commodities in that commerce are dealt in and practices  
26 affecting such prices.”).

findings from 1977 and Attorney General's Report from 1986); *Corp*, 236 F.3d at 332 (citing Congressional findings from 1986); *Angle*, 234 F.3d at 337 (citing Congressional findings from 1978); *Robinson*, 137 F.3d at 656 (same). Those findings provide no basis to assume that such an industry still exists.<sup>11</sup> Reasoning based upon a market theory is thus inappropriate.

**IV. Even if the Statutes are Facially Valid, the Instant Prosecution Must Fail Under the Case-by-Case Analysis Required by *Lopez*, *Morrison* and *Jones* Because the Facts Fail to Demonstrate a Sufficient Nexus to Interstate Commerce**

The Sixth Circuit, in *United States v. Corp*, 236 F.3d 325 (6th Cir.2001), reversed a conviction obtained under section 2252(a)(4)(B) on grounds that the defendant's conduct was not related to interstate commerce. In *Corp*, the defendant had taken photographs of a 17-year-old girl while she engaged in sexual acts with his wife. The only connection to interstate commerce was the fact that the photographs, which were taken in Michigan and then developed at a local pharmacy, were printed on photographic paper that had been manufactured outside Michigan. In rejecting the government's argument that the jurisdictional element of the statute was satisfied by the mere movement of the paper from one state to another, the court instead conducted the "case-by-case" analysis required by *Lopez* and *Morrison*. *See id.* at 332-33. After first noting that the defendant had raised "serious questions" about the statute's constitutionality, the court declined to reach that issue and instead determined that the jurisdictional element must function as a "meaningful restriction" on federal regulation. Applying that test, the court concluded that the statute failed as applied.<sup>12</sup>

---

<sup>11</sup> In response, the government may argue that a national market exists and that local acts are commercial in nature. Should the government come forward with such evidence, this Court must then decide whether it may rely on this evidence in ascertaining the constitutionality of the statute, when it is Congress' function to provide adequate findings in the first instance.

<sup>12</sup> In its analysis, the *Corp* court erroneously relied upon category three, which Mr. Croxford has already argued does not apply to sections 2251(a) and 2252A. Nonetheless, the *Corp* court found that the defendant's conduct did not substantially affect commerce for the following reasons:

1 In light of the limited jurisdictional basis of the statute, this Court must focus solely on the  
 2 movement of the camera, disk and hard drive to Utah. On the present facts, Counts One and Two  
 3 cannot stand because the link to commerce is wholly inadequate. While Mr. Croxford's subsequent  
 4 use of the camera, disk and hard drive may be reprehensible, the fact that these consumer goods were  
 5 manufactured outside Utah cannot give rise to federal jurisdiction because there is no causal  
 6 relationship between the jurisdictional element and Mr. Croxford's conduct, and because the link to  
 7 commerce is wholly attenuated. *See Hodel*, 452 U.S. at 277 (emphasis added) (Congress' chosen  
 8 means of regulation must relate "to the attainment of a legitimate end, *the effective execution of the*  
 9 *granted power to regulate interstate commerce*"). Rather than regulating commerce, the application  
 10 of the statutes to these facts would impermissibly regulate the purely intrastate creation and  
 11 possession of child pornography and would permit federal regulation of all local criminal activities.

12  
 13 **V. The Portions of Sections 2251(a) and 2252A Supporting the Indictment Must be Struck**  
 14 **Down as Violative of the Equal Protection Clause of the Constitution**

15  
 16 Mr. Croxford would be immune from prosecution if his digital camera, computer disk and  
 17 hard drive had been manufactured in Utah. Similarly, if Mr. Croxford were an engineering wizard  
 18 who built his own camera, disk or hard drive, he would not be subject to prosecution. By the same  
 19 token, similarly situated child pornographers who use the same materials manufactured in Utah  
 20 would not be subject to federal prosecution under this statute. This arbitrary and disparate treatment  
 21 violates the Equal Protection Clause of the Constitution and requires that the portion of the statutes

22  
 23  
 24 Corp was not involved, nor intended to be involved, in the distribution or sharing with others  
 25 of the pictures in question. [The victim] was not an "exploited child" nor a victim in any real  
 26 and practical sense in this case. In the other cases that have addressed this issue, the courts  
 were faced with the much more threatening situation where an adult was taking advantage of  
 a much younger child or using the imagery for abusive or semi-commercial purposes.

*See id.*

1 underlying Counts One and Two be struck down. U.S. Const. amend. V.

2 “Equal protection does not require that all persons be dealt with identically, but it does  
3 require that a distinction made have some relevance to the purpose for which the classification was  
4 made.” *Baxtrom v. Herold*, 383 U.S. 107, 111 (1966). Here, because the distinction between local  
5 and out-of-state materials is not relevant in any meaningful way to the targeted conduct, section  
6 2252A(a)(5)(B) cannot stand. Indeed, there is no rational basis for the distinction between in-state  
7 and out-of-state materials other than the fact that the former category clearly falls outside Congress’  
8 regulatory powers while the latter category evidences a Congressional attempt to expand its  
9 jurisdiction over local criminal matters. Mr. Croxford is denied equal protection of the law because  
10 other individuals using materials that bear no incidental connection to commerce cannot be  
11 prosecuted. *Cf. United States v. Oliver*, 60 F.3d 547, 550 (9th Cir. 1995) (declining to consider equal  
12 protection challenge to car-jacking statute because challenge had not been raised in district court).  
13 Because this statutory fluke is not rationally related to any legitimate government interest, the  
14 differing treatment therefore violates the Equal Protection Clause of the Constitution.

15 While Congress’ efforts to eradicate creation and possession of child pornography may  
16 indeed be advanced by the instant prosecution, this tautology does not address the core equal  
17 protection issue: whether the distinction is rationally related to the goal. Plainly, it cannot be  
18 contended that this is a rational distinction when the distinction arises simply because Congress has  
19 no other choice under the Commerce Clause. Rather, if Congress can regulate only one category of  
20 child pornographers by virtue of some trivial reason that is unrelated to their pornographic activities,  
21 Congress must not be permitted to legislate in this area at all because it is constitutionally  
22 impermissible to arbitrarily expose only certain people to the serious consequences of a federal  
23 prosecution. *See Bush v. Gore* 121 S.Ct. 525, 530 (Dec. 12, 2000) (ordering end to recount of  
24 Florida’s votes in presidential election because different counties would use different standards to  
25 determine “intent of voter,” thus resulting in violation of equal protection through “unequal  
26 evaluation of ballots”). More resourceful child pornographers may evade federal prosecution by

1 locating materials that have not crossed state lines or by choosing to live in a state where all the  
 2 necessary tools are manufactured. This absurd result requires that the indictment be dismissed.

3  
 4 **VI. Sections 2251(a) and 2252A(a)(5)(B) are Void for Vagueness Because the Term**  
 5 **“Materials” is Not Defined Anywhere in the Statutes, Thus Inviting Arbitrary Enforcement**  
 6 **and Precluding Ordinary Persons From Determining Whether Their Conduct Will Violate**  
 7 **Federal Law**

8  
 9 In order to withstand a constitutional challenge on grounds of vagueness, a statute must be  
 10 sufficiently clear that persons of common intelligence will not be forced to guess at its meaning and  
 11 application. *See United States v. Lanier*, 520 U.S. 259, 266 (1997). The statute’s terms will be void  
 12 for vagueness where those terms invite arbitrary and discriminatory enforcement. *See United States*  
 13 *v. Makowski*, 120 F.3d 1078, 1080 (9th Cir. 1997). A statute is void for vagueness when it does not  
 14 sufficiently identify the conduct covered. *See id.*

15 Here, the statutes’ operative terms giving rise to federal jurisdiction, the use of “materials” to  
 16 produce the pornography, is defined nowhere within sections 2251 or 2252A or the underlying  
 17 statutory scheme. Definitions for the chapter are contained in 18 U.S.C. § 2256, but the term  
 18 “materials” is not found therein. “Materials,” then, could mean the linoleum on which one stands to  
 19 film a pornographic act, the hairs in the paintbrush used to paint a nude portrait, the light fixture used  
 20 to illuminate the room where photographs are taken, or even, as suggested earlier, the air that one  
 21 must breathe while producing the pornographic image. While Congress may have inserted the term  
 22 “materials” to provide the federal government with a flexible enforcement tool, it is clear that the  
 23 tool is too flexible to be constitutionally permissible. Rather, ordinary persons would have no way of  
 24 knowing whether their conduct is covered by the act. Indeed, the only limiting factor would be the  
 25 creativity of federal agents in determining whether some minuscule component of the defendant’s  
 26 operation had previously existed in another state or country.

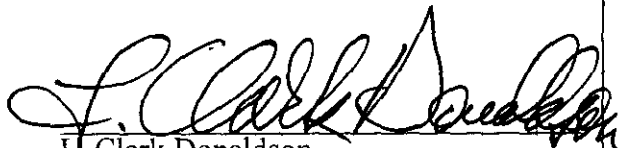

1 This vagueness permits the government to arbitrarily charge only certain cases in federal  
2 court, without any discernible limits on its charging function. It also precludes ordinary people from  
3 recognizing in advance whether their conduct will fall within the statute because people will not  
4 understand the reach of the term "materials" and will generally have no knowledge regarding where  
5 the component parts of their personal belongings were manufactured. *See Makowski*, 120 F.3d at  
6 1080. Because ordinary persons are left to guess at the meaning of the statutes and will not realize  
7 that they have violated federal law until the government seizes and researches their belongings, the  
8 portion of the statute pertaining to "materials" that moved in commerce must be struck down as  
9 unconstitutionally vague.

10 **CONCLUSION**

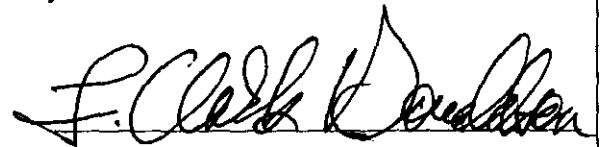

11 For the foregoing reasons, Mr. Croxford respectfully requests that the Court dismiss the  
12 indictment.

13 DATED this 24<sup>th</sup> day of January 2003.

14   
15 F. Clark Donaldson  
16 Attorney for Mr. Croxford

17 **Certificate of Service**

18 I hereby certify that a copy of the foregoing Motion to Dismiss for Lack of Jurisdiction was  
19 hand delivered/mailed first class postage prepaid to Assistant U.S. Attorney Michele Christiansen,  
20 185 South State Street, Suite 400 this 24<sup>th</sup> day of January 2003.
